**P 95**

Suportul de curs este destinat studenților facultății de Cadastru, Geodezie și Construcții UTM, răspunzând pregnant necesităților de predare a limbii engleze - limbaj specializat. Conținutul Cursului se pliază pe nivelul de cunoaștere **B1-B2**, fiind asigurat pe durata semestrului 2 al anului I U.

Lucrarea cuprinde 7 unități didactice, construite în jurul unor subiecte precum: Civil engineering vs. Construction engineering; Traditional building materials vs. Modern building materials; House building; Public works; The importance of Real Estate Assessment; The importance of Fire Safety and Civil Protection Engineering; Construction Law.

Fiecare unitate de curs constituie produsul unui studiu în vederea dezvoltării armonioase a celor 4 competențe lingvistice: Reading, Speaking, Writing și Listening.

Sarcinile sânt formulate clar și laconic, concentrând atenția studentului asupra fixării terminologiei și valorizând, în particular, aspectul comunicării orale.

Lucrarea se caracterizează prin coeziune, informație pertinentă, transparență în realizarea obiectivelor didactice și perspective clare de dezvoltare în continuare a tematicilor abordate.

Elaborarea dată poate fi folosită atât pentru studierea limbii engleze specializate în clasă, cât și individual.

***Autor:*** Liliana Prozor-Barbalat
