

MD.24.

Title	Avis collection
Authors	Țurcan E., Tocarciuc A., Racceeva E., Sugac O.
Institution	Faculty of Textiles and Polygraphy
Patent no.	-
Description	The clothing collection has an original artistic character by embodying birds images in modern design solutions. The embellishment on the models implies a new approach to traditional decorative techniques: artistic print, mechanical application and embroidery. One of the novelties of the collection is the use of the phosphorous wire in the decorative solution of the collection.
