**Title:** ADAPTIVE MEDICAL CLOTHES

**Patent/project number:** WIPO85961, DM/203338

**Author/s:** Victoria Danila, Stela Balan, Antonela Curteza, Dorina Rotaru, Ana Ischimji

**Institution:** Technical University of Moldova, Technical University Gh. Asachi Iasi

**Category:** M

**Description:** Medically adaptable clothing for children (premature babies, infants, toddlers and infants) aims to care for and provide harmless medical care. The clothes are carefully designed to adapt to medical treatments, to ensure safe and comfortable dressings. The constructive-compositional elements are characterized by functionality and adjustments corresponding to the requirements of the investigated patients.

**State of development:** prototype
