Design and Content of Biomedical Curriculum for Biomedical Engineering Master's Program in the Republic of Moldova

V. Vovc, S. Lozovanu, A. Ganenco and N. Ciobanu

Department of Human Physiology and Biophysics, State University of Medicine and Pharmacy "Nicolae Testemitanu", Chisinau, Republic of Moldova

This article presents the design and content of biomedical disciplines included in biomedical engineering master's program for universities of the Republic of Moldova. The biomedical curriculum of the biomedical education program contains two fundamental disciplines: 1.Functional anatomy and physiology; 2.Biophysics. To make more familiar future biomedical engineers with technical part of medical practice one applied discipline is proposed: Diagnostics and treatment methods in medicine.
